Industry Dust Reference Values

Adopted by ESA-STAT, February 2, 2012

Crop (species)	Dust reference value
Maize	0.75 g / 100,000 seeds
Oil seed rape	0.5 g / 700,000 seeds
Beet	0.25 g / 100,000 seed pellets
Sunflower	0.4 g / 75,000 seeds

This document has been prepared under surveillance of ESA-STAT.

These industry dust reference values are published to assist the seed treatment industry to continually achieve safe treatments. Seed treating companies have to assure that treated seed meets the industry dust reference values.

It is noted that Member States may install legal dust limits different from the industry reference values.
