EU seed industry facts

Total value EU Seed Industry (6.8 bln €)

Innovation and impact

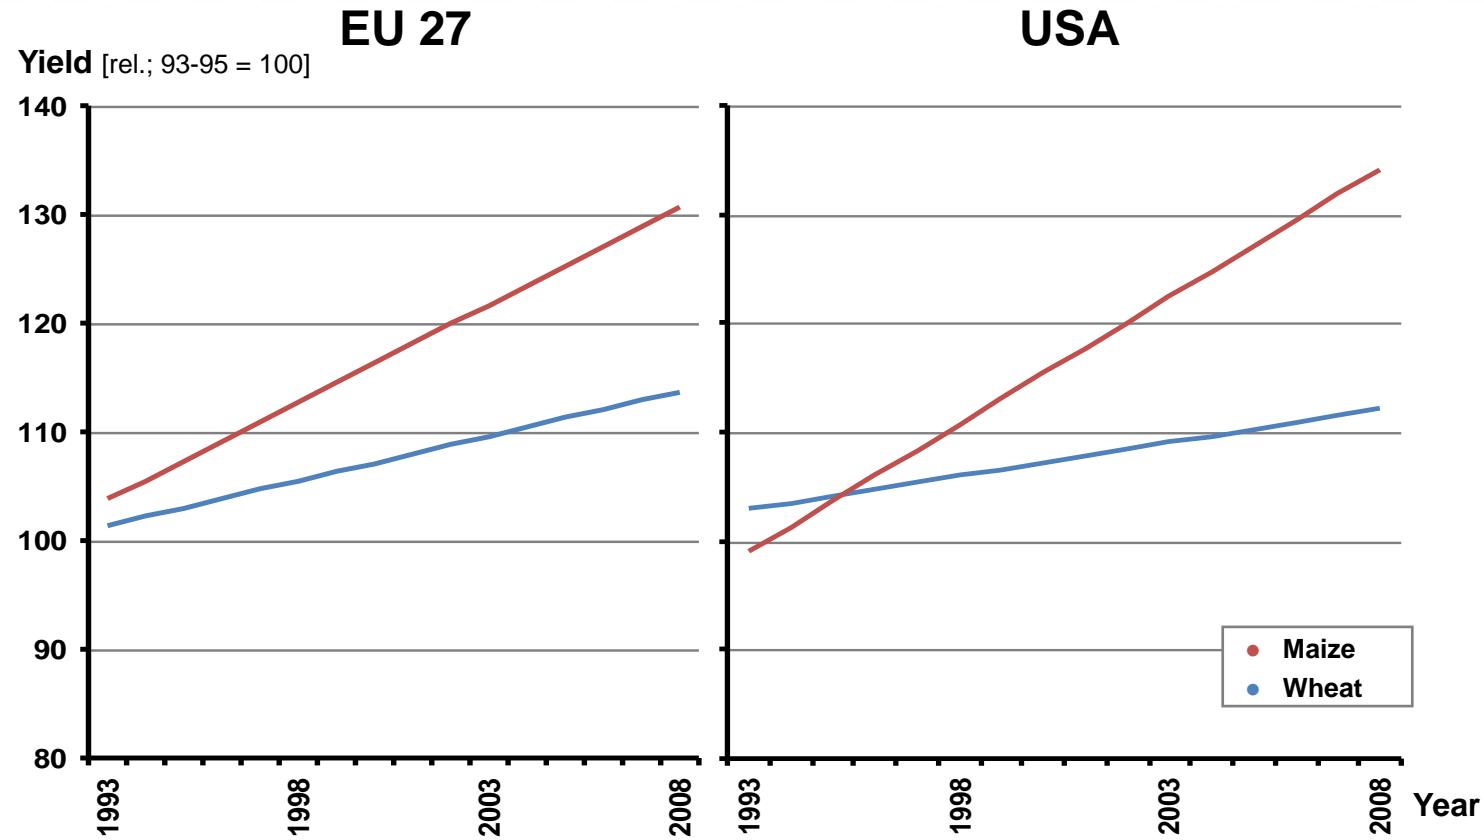

Value seed market EU	€ 6.8 bn
Annual R&D spending of seed industry EU	ca. 15% (of t.o.) = € 1 bn
Employment in seed industry EU	ca 52.000

Value seed market EU	€ 6.8 bn
Farm gate value agric. products EU	> € 70 bn
Value processed agric. Products EU	> € 700 bn

Factors determining innovation

Yield development in maize and wheat in the EU and US

Source: FAOSTAT; own calculations, 1993-1995 = 100

Conclusions

- Progress in farming depends on improved genetics
- Improved genetics result from high R&D investment
- R&D investments need a fair return
- Return on investment depends on supportive regulatory framework in
 - R&D support
 - Effective protection and enforcement of IPRs

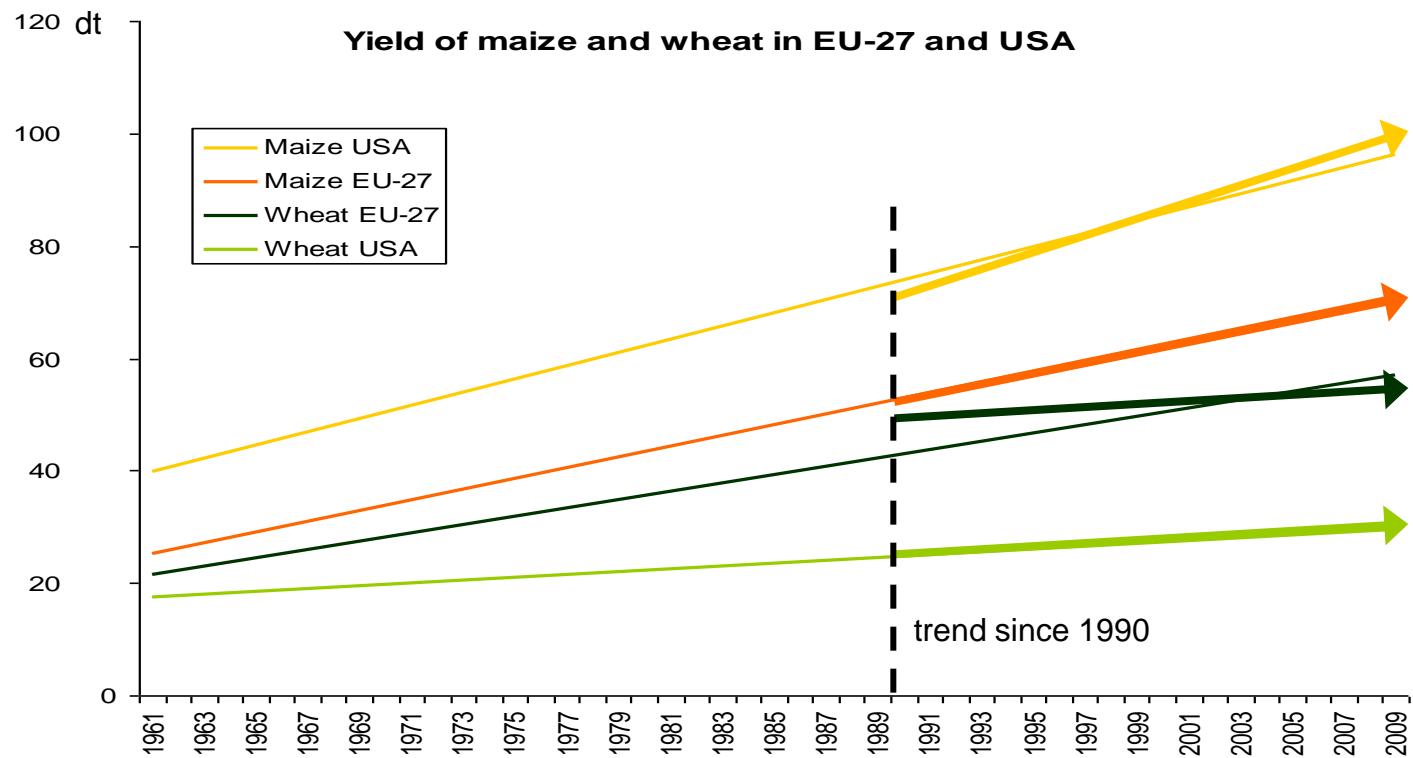

Where the necessary return on investment in breeding can not be achieved due to ineffective rules for enforcement of IPRs, innovation declines
